

# Measuring the Weather

www.geographyalltheway.com

## Across

1. An extended period of months or years when a region notes a deficiency in its water supply
5. A type of cloud that is tall, dense, and involved in thunderstorms and other intense weather
10. An instrument for showing the direction of the wind
12. A facility with instruments and equipment for observing atmospheric conditions
15. An instrument that measures atmospheric pressure
17. Measures the maximum and minimum temperature during a given time
18. A localized and violently destructive windstorm occurring over land characterized by a funnel-shaped cloud extending toward the ground
19. A device with a wet and dry bulb thermometer used to measure humidity

## Down

2. The amount of water vapor in the air
3. A severe tropical cyclone usually with heavy rains and winds above 119 km/h
4. A device, used in meteorology, to measure rainfall
6. A prolonged period of excessively hot weather
7. Very strong winds, usually force 7 to 10 on Beaufort scale
8. The falling to earth of any form of water
9. An overflow or accumulation of an expanse of water that submerges land
11. A device that measures temperature
13. Of the greatest possible degree or extent or intensity
14. A device for measuring the wind speed
16. Precipitation of ice pellets
